Any additional information

Greystones Medical Centre

Who we are:

At Greystones we have a growing list with around 3800 patients in S11. We have a stable population consisting mainly of young families and working age individuals. We have no care homes and a very low number of home visits. A Drop In clinic runs twice a week which is very popular with our demographic and provides good access.

We work in a purpose built building with a newly developed lower ground floor, providing more opportunity to develop, as well as staff parking.

We are a GMS Practice using SytmOne, have weekly team meetings, and are an active member of the Porter Valley Network. Our GP is also part of a Research Group. Currently we are involved in training F2 doctors, and Medical students from several Universities. We are seeking to become a GP Training Practice.

Who we are seeking to join us:

You would join a small agile team, who are able to adopt change quickly and take opportunities. We are very well supported by our reception team and have strong administration and managerial support, who are forward looking and driven. You would become a key influencer in the running and development of the practice, showing clear commitment. We need a buoyant and enthusiastic person, who is pro-active and keen to continue developing themselves and the Practice.

We are looking for an individual who has or is developing good leadership skills to support and manage this small robust business, ultimately taking on a 50:50 partnership

Informal visit welcome, please inform Practice Manger to arrange linda.benn@nhs.net
